E-ZEE WEBLON BACKING

Ever used a thick backing and been dissatisfied when the remaining backing shows through the garment or causes skin irritation? Use our new cut away E-Zee Weblon backing, problem solved! Brilliant results are achieved on light coloured fabrics as it does not show through.

OUR BRAND NEW SUPERSTAR BACKING IS A REAL PROBLEM SOLVER

This soft and sheer low visibility cut away backing has a very fine texture making it ideal for use on lightweight fabrics as it prevents pulling and sagging and avoids skin irritation. Although fine, it has a very high stabilising property and is heat-resistant with a melting point of 260°C. Great for embroideries on T-shirts, polo shirts and performance wear.

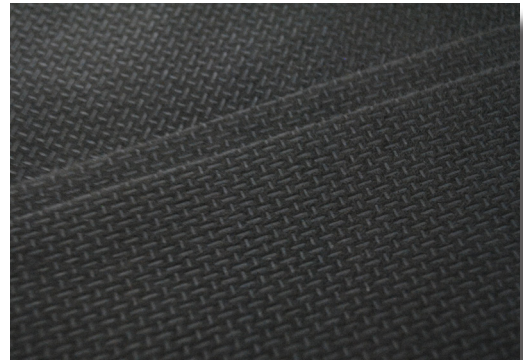

Colour: White
Product Code: 051WL50W
44g - 50cm x 45m

Colour: Black
Product Code: 051WL50S
34g - 50cm x 45m

Also available in 20cm² 250 cut pieces

HOW TO USE FOR PARTICULARLY STRETCHY ITEMS

- If extra stability is needed, or for designs over 8,000 stitches, use two pieces or add a piece of E-Zee Tear lightweight backing.
- If using with E-Zee Tear, first lay down a piece of E-Zee Tear lightweight, then a piece of E-Zee Weblon No Show backing and finally the garment.
- Embroider the design and remove from the hoop.
- Tear off the E-Zee Tear, then cut away the excess E-Zee Weblon.
- The result is a low profile, no show backing, with no risk of producing a 'badge effect' that does not irritate the skin.
