

SPRAY PRODUCTS

Madeira offers a comprehensive range of sprays - lubricants and cleaning plus temporary or permanent adhesives. Spray adhesives are used to hold cut pieces or appliqués in place during embroidery or to position garments or items which cannot be hooped, such as caps and bags.

Where possible *spray the appliqué not the base material*. The aim is to obtain just enough sticking strength to hold the cut pieces in place whilst embroidering.

Madeira sprays guarantee trouble free production.

LB5 SPRAY LUBRICANT

Lubricant spray specifically developed for use on industrial embroidery machines Rotary Hook, Needle Bar Driver & Bearing, Connecting Rod & Head Trimming parts. With over 3600 applications per can this spray is very cost effective.

Art No. LB5 300ml/10oz Can

DO NOT SPRAY ON THREADS OR FABRIC

HI-TECH POWER CAN

Use to blast away lint and dust, essential for service or repair work the contact free removal of surface contamination is important as dust can scratch sensitive machine parts. Includes a flexible 15cm capillary tube for ease of application.

Art No. G2050 400ml Can

MSA 1100

Essential for temporary positioning of appliqués & cut pieces. The high adhesive action is sustained for around one hour. Economical to use containing 350g per can, more than most 500ml cans.

Art No. MSA1100 500ml can

ALWAYS TEST ON THE FABRIC BEFORE USE

MSA SPRAY REMOVER

Easy to use cleaning agent to remove adhesive residue from hoops, needles, tables & other machine parts.

Ideal for use with any spray adhesive.

Art No. 4345 150ml can

A505 SPRAY ADHESIVE

This spray on, peel off temporary adhesive is suitable for any fabric delicate, heavy or stretch. The spray leaves no residue and will not gum up needles. For fine fabrics use AD505 with a stronger backing to prevent puckering.

Art No. AD505 250ml can

ALWAYS TEST ON THE FABRIC BEFORE USE

AD606 SPRAY ADHESIVE

A heat seal adhesive spray suitable for use on most fabrics. Can either be peeled off for easy repositioning or is permanent once heat-pressed. Please refer to our 'How To' Leaflet for full instructions.

Art No. AD606 250ml can

ALWAYS TEST ON THE FABRIC BEFORE USE

HOW TO LEAFLETS ARE AVAILABLE FOR ALL OUR SPRAY PRODUCTS

Please make sure tests are performed with all our sprays to ensure suitability.

Please note: Due to transport regulations, your spray must be despatched by carrier service.
