

REFLECTIVE THREAD

REFLECT-T50 is a new addition to our specialist thread range. This 20 weight decorative embroidery thread is designed to run well on industrial embroidery machines, giving a true reflective finish when illuminated by a light source. Perfect for enhancing visibility in the dark or in difficult weather conditions on workwear, sportswear, fashion and other applications.

N.B. It is not designed to replace safety wear, where strict norms for reflectivity values are specified.

TIP!

For optimum results

- Remove unnecessary small stitches
- Tighten top tension
- Reduce machine speed

The special layer of glass microspheres produces a reflective finish. Use with correct backing for fabric type.

Ideal for:

- Fashion
- Schoolwear
- Sportswear
- Workwear
- Uniformed sectors

Art. No. **REFLECT-T50-250M**
250m

Art. No. **REFLECT-T50**
1000m
